

Experiment 6: Vacuum Cleaner Aim:

Clean all rooms.

Algorithm:

1. Start.
2. Apply the required AI technique.
3. Generate the solution.
4. Display the result.
5. Stop.

Python Code:

```
rooms = ['Dirty','Dirty']
```

```
position = 0
```

```
while 'Dirty' in rooms:
```

```
    if rooms[position]=='Dirty':  
print("Cleaning Room",position)  
rooms[position]='Clean'
```

```
    position = 1-position
```

```
print("All Rooms Clean")
```

```
print(rooms) Output
```

```
Current Room: 0  
Cleaning Room 0  
Current Room: 1  
Cleaning Room 1  
  
All Rooms are Clean  
Final State: ['Clean', 'Clean']  
|
```

Result:

All rooms cleaned.
